

Grüner Veltliner Alte Reben 2018

Weinviertel DAC

Origin:	Weinviertel, Austria
Varietal(s):	Grüner Veltliner
Color:	White
Description:	Herbal notes typical of the variety, along with distinct minerality and fine white pepper. The palate is juicy and crisp. The characteristic freshness and fruit of the Falkensteiner terroir is impressive – as is the animated elegance.
Terroir:	The „Neuberg“-vineyard is a southern site located on a slope with a soil rich in humus and layer. The 25 to 30 years old vines bear a wine with a strong mineralic character.
Vinification:	The pressing is done after a skin-contact of approximately 6 hours, followed by a slow fermentation below 20° Celsius. After maturing on the fine- lees until the end of February, the wine will be bottled.
Food-Pairing:	Smoked trout, grilled scampi, calamari fritti, bread fried cod-fish, bread fried carp, grilled fish & seafood, roastbeef, roast pork, breaded fried veal escalope

The Winery

Dürnberg in the picturesque village of Falkenstein is managed by winemaker Christoph Körner together with his friends and business partners Matthias Marchesani and Georg Klein. „The three from Dürnberg“ are true wine enthusiasts and therefore constantly aim at the creation of wines with strong character that unite the traditional and the modern in a refined, sophisticated way.

The mixture of limestone and loam comprise the typical wine soil – the terroir - of the region. Elegance, complexity on the palate and cool minerality are rooted here.

No matter which measures are taken in the vineyards, the sustainable use of natural resources is at the forefront of Dürnberg's care. As every detail of the vineyards is known, the team has formulated his own rules of eco-management. Only resources that are permitted for "controlled integrated production" are used. Because of this sustainable management, the Dürnberg team is proud of their healthy old vineyards with up to 60 years old vines!

Dürnberg Winery is a „Leading Wine Producer“ of the Weinviertel region and certified for its sustainable production.
