

## ALTES KREUZ Traminer Reserve 2017

Origin:	lower austria, Austria
Varietal(s):	Traminer
Color:	White
Description:	Typical of the variety, floral-aromatics with tropical fruit in the nose and on the palate; powerful yet elegant with an animated fruit-acidity balance, fine minerality, long finish, great potential.
Terroir:	The Traminer site is located at apr. 300 meters above sea level facing south and therefor is very exposed to the sun. The soil is fairly sandy and has a good drainage which allows the harvest of healthy grapes of perfect ripeness without noble rot.
Vinification:	4 to 6 months on the lees, 1/3 in 500 l oak barrels, 2/3 in stainless steel.
Food-Pairing:	Goose liver paté, oast duck with cherry sauce, duck á l'orange, wildfowl, curry-dishes, medium-highly seasoned dishes, assorted cheese with pear chutney & nuts, bluecheese with acacia honey, dessert with fruits, yeast dumpling filled with plum jam.

### The Winery

Dürnberg in the picturesque village of Falkenstein is managed by winemaker Christoph Körner together with his friends and business partners Matthias Marchesani and Georg Klein. „The three from Dürnberg“ are true wine enthusiasts and therefore constantly aim at the creation of wines with strong character that unite the traditional and the modern in a refined, sophisticated way.

The mixture of limestone and loam comprise the typical wine soil – the terroir - of the region. Elegance, complexity on the palate and cool minerality are rooted here.

No matter which measures are taken in the vineyards, the sustainable use of natural resources is at the forefront of Dürnberg´s care. As every detail of the vineyards is known, the team has formulated his own rules of eco-management. Only resources that are permitted for “controlled integrated production” are used. Because of this sustainable management, the Dürnberg team is proud of their healthy old vineyards with up to 60 years old vines!

Dürnberg Winery is a „Leading Wine Producer“ of the Weinviertel region and certified for its sustainable production.
